

flannel tape	
Introduction	flannel tape is a wire harness tape made of flannel (PET) based material and coated with a high-performance acrylate pressure-sensitive adhesive. It has high strength and durability, flame retardant, does not shrink or warp at high and low temperatures, and is easy to tear
Application	1.It should be used for server and computer wiring harness bundling and fixing. 2.It is used in home appliances and display wiring harnesses bundled and fixed 3.It is used for automobile wiring harness bundling and fixing
Property	
Product Code	P2028B
Technical Parameters	
Color	Black
Total Thickness [mm]	0.28
Backing	flannel (PET)
Adhesive	Rubber pressure sensitive
180° Peel Strength[N/cm]	2
Tensile Strength[N/inch]	50
Elongation at break[%]	10
Temperature resistance[°C]	-40 (4H) 105 (3000H) 130 (240H)
Noise reduction performance	Class C
Abrasion resistance (Scrape)	Class A
Flame retardation	Class B self-extinguishing
Storage and shelf life	It is recommended to store in a clean and dry place, away from direct sunlight, to prevent damage to the packaging, and to avoid keeping it with volatile solvents. The storage temperature is 10-40° C and the humidity is 40-60%. To maintain optimal performance, this product should be used within 12 months from the date of manufacture.
